

The figure is a box plot with two panels, labeled 'Category 1' and 'Category 2' on the x-axis. The y-axis represents a numerical value from 0 to 100. A legend in the top right corner indicates that 'Stage 0' is represented by grey and 'Stage 1' by pink. Each panel contains two box plots: a grey one for Stage 0 and a pink one for Stage 1. Individual data points are overlaid on the box plots. In Category 1, the Stage 0 box plot has a median around 25, while the Stage 1 box plot has a median around 55. In Category 2, both Stage 0 and Stage 1 box plots have medians around 50. The whiskers for Stage 0 in Category 1 extend from approximately 0 to 80, while for Stage 1 they extend from approximately 10 to 95. In Category 2, the whiskers for both stages extend from approximately 0 to 100.

A horizontal number line with two tick marks. The tick mark on the left is labeled '0' and the tick mark on the right is labeled '1'.
